Re: EPA Reg. No. 91601-R: Stability Information and Revised CSF

Dear Ms. Marchese:

The Acta Group (Acta[®]) on behalf of SenesTech, Inc. (SenesTech) is pleased to submit the following volume to supplement the pending registration application for ContraPest[®], EPA Reg. No. 91601-R:

Vol.	Guideline No.	Study Report Title	MRID No.
1	830.6317	<i>Formulation Stability Information, Supplement to MRID 49700119, Report No. 6002-001-24</i>	49893401

This volume addresses the stability of 4-vinylcyclohexene diepoxide (VCD) in the formulated product. With this and the prior submissions on March 30, 2016, and March 31, 2016, SenesTech believes it has responded to all of the issues that you raised in your March 21, 2016, e-mail, but please advise if EPA requires additional information or clarifications.

In preparing the accompanying volume, SenesTech realized that a revision to the lower certified limit (LCL) for VCD on the most recently submitted (March 31, 2016) ContraPest[®] Confidential Statement of Formula (CSF) is warranted. A revised CSF is attached to this letter. The only change between the March 31, 2016, CSF and the attached is the LCL for VCD (and the date).
